# CAT® SIMULATORS SIMLITE

**OPERATOR  
TRAINING**

## **SIMSCHOLARS™ CURRICULUM**

Combine hands-on simulator training and SimScholars™ curriculum for a blended learning experience. The online platform is perfect for remote learning with a complete, turn-key solution. The combination means heavy equipment operators will get to competency faster than traditional methods of training.

## **BUILT WITH OEM CONTROLS**

Learners get hands-on experience with the same controls as found in the actual machines. Training exercises are developed with Cat® subject-matter experts and based on the same machine applications used on real-world worksites. Training in a virtual environment ensures learners are safe and mishaps don't have the same impact as a real-life accident.
